EE 446/646 – Photovoltaic Devices and Systems
Course Syllabus

Instructor: Dr. Y. Baghzouz
Office Room # SEB-2167
Tel. # 895-0887
Fax # 895-4075
Email address: Yahia.Baghzouz@unlv.edu
Office Hours: T & TR: 10:30-12:30 and 2:00-2:30, W: 11:00-12:00

Recommended References:
7. Photovoltaic systems / James P. Dunlop, 2010
11. Modeling photovoltaic systems using PSpice / Luis Castañer and Santiago Silverstre
12. IEEE Photovoltaics Specialists Conference Proceedings

Course Content:

- **Renewable Energy Systems (Chap. 8):** direct solar power conversion (PV), concentrating solar power, wind power, hydro power, biomass, geothermal power, ocean power,
- **The Solar Resource (Chap. 4):** solar spectrum, sun position, sun path diagrams, solar and clock times, clear sky insolation on a collecting surface, solar radiation measurements, resource of solar data.
- **Photovoltaic Materials (Chap 5):** semiconductor physics, photovoltaic materials.
• **PV Electrical Characteristics (Chap 5):** equivalent circuit of a PV cell, modules and arrays, I-V curves, impact of temperature, shading impacts.

• **Grid-Connected PV Systems (Chap 6):** I-V Curves of simple loads and batteries, interfacing with the utility, system sizing, economic considerations.

• **Stand-Alone PV Systems (Chap 6):** load estimation, batteries and their properties, array and battery sizing, hybrid-PV systems, case study of PV-powered water pumping.

• **Other Related Topics:** National Electric Code (NEC), IEEE Standard 1547, industry trends, etc …

**Course Outcome:**

Students should be able to:

• Locate the sun position at any given location and time, interpret sun path diagrams, analyze solar insolation on a collecting surface, and measure solar radiation measurements.

• Understand the inner workings of p-n junctions, determine a circuit model of a PV cell, PV module and PV array, measure and interpret I-V curves, understand the impact of temperature and solar insolation on I-V curves, have a broad knowledge on different types PV technologies and their limitations.

• Determine the operating point of basic electrical loads connected directly to a PV module or array.

• Design a grid-connected PV system, including the PV array and balance of system (BOS), conduct an economic analysis, and be familiar with the impact of high PV penetration on the utility grid.

• Have basic knowledge on different types of batteries and their electrical characteristics.

• Design a stand-alone PV system by estimating the load, sizing and selecting the batteries, sizing and selecting the PV modules, charge controller and inverter.

• Have basic knowledge on material properties of array mounting systems, forces acting on PV arrays, and design and installation guidelines.

• Have basic knowledge on codes and standards associated with PV Systems (i.e., the National Electric Code (NEC) and IEEE Standard 1547).

**Computer Useage:**

PV-Watts, PVsyst, Excel

**Tests:**

**Grading:**
A ≥ 100 > B ≥ 80 > C ≥ 60 > D ≥ 45 > F

**Notes:**
- Graduate students will be given more challenging test questions, and individual projects.
- Homework will be assigned but not collected. Everyone is encouraged to do the assigned homework problems - some of the test and quiz problems will be similar.
- There will be no make-up tests or quizzes.
- There will be no extra credit work for individuals.
- Class attendance and participation is highly encouraged. Students who arrive 10 minutes late will not be allowed to sign the attendance sheet.

**Academic Misconduct** – Academic integrity is a legitimate concern for every member of the campus community; all share in upholding the fundamental values of honesty, trust, respect, fairness, responsibility and professionalism. By choosing to join the UNLV community, students accept the expectations of the Academic Misconduct Policy and are encouraged when faced with choices to always take the ethical path. Students enrolling in UNLV assume the obligation to conduct themselves in a manner compatible with UNLV’s function as an educational institution.

An example of academic misconduct is plagiarism. Plagiarism is using the words or ideas of another, from the Internet or any source, without proper citation of the sources. See the *Student Academic Misconduct Policy* (approved December 9, 2005) located at [http://studentconduct.unlv.edu/misconduct/policy.html](http://studentconduct.unlv.edu/misconduct/policy.html).

**Copyright** – The University requires all members of the University Community to familiarize themselves and to follow copyright and fair use requirements. **You are individually and solely responsible for violations of copyright and fair use laws.** The university will neither protect nor defend you nor assume any responsibility for employee or student violations of fair use laws. Violations of copyright laws could subject you to federal and state civil penalties and criminal liability, as well as disciplinary action under University policies. Additional information can be found at: [http://provost.unlv.edu/copyright/statements.html](http://provost.unlv.edu/copyright/statements.html).

**Disability Resource Center (DRC)** – The Disability Resource Center (DRC) determines accommodations that are “reasonable” in promoting the equal access of a student reporting a disability to the general UNLV learning experience. In so doing, the DRC also balances instructor and departmental interests in maintaining curricular standards so as to best achieve a fair evaluation standard amongst students being assisted. In order for the DRC to be effective it must be considered in the dialog between the faculty and the student who is requesting accommodations. For this reason faculty should only provide students course adjustment after having received this “Academic Accommodation Plan.” If faculty members have any questions regarding the DRC, they should call a DRC counselor.

UNLV complies with the provisions set forth in Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. The DRC is located in the Student Services Complex (SSC-A), Room 143, phone (702) 895-0866, fax (702) 895-0651. For additional information, please visit: [http://drc.unlv.edu/](http://drc.unlv.edu/).

**Religious Holidays Policy** – Any student missing class quizzes, examinations, or any other class or lab work because of observance of religious holidays shall be given an opportunity during that
semester to make up missed work. The make-up will apply to the religious holiday absence only. It shall be the responsibility of the student to notify the instructor no later than the first two weeks of classes of his or her intention to participate in religious holidays which do not fall on state holidays or periods of class recess. This policy shall not apply in the event that administering the test or examination at an alternate time would impose an undue hardship on the instructor or the university which could have been avoided. For additional information, please visit: http://catalog.unlv.edu/content.php?catoid=4&navoid=164.

Tutoring – The Academic Success Center (ASC) provides tutoring and academic assistance for all UNLV students taking UNLV courses. Students are encouraged to stop by the ASC to learn more about subjects offered, tutoring times and other academic resources. The ASC is located across from the Student Services Complex, #22 on the current UNLV map. Students may learn more about tutoring services by calling (702) 895-3177 or visiting the tutoring web site at: http://academicsuccess.unlv.edu/tutoring/.

UNLV Writing Center – One-on-one or small group assistance with writing is available free of charge to UNLV students at the Writing Center, located in CDC-3-301. Although walk-in consultations are sometimes available, students with appointments will receive priority assistance. Appointments may be made in person or by calling 895-3908. The student’s Rebel ID Card, a copy of the assignment (if possible), and two copies of any writing to be reviewed are requested for the consultation. More information can be found at: http://writingcenter.unlv.edu/.

Rebelmail – By policy, faculty and staff should e-mail students' Rebelmail accounts only. Rebelmail is UNLV's official e-mail system for students. It is one of the primary ways students receive official university communication such as information about deadlines, major campus events, and announcements. All UNLV students receive a Rebelmail account after they have been admitted to the university. Students' e-mail prefixes are listed on class rosters. The suffix is always @unlv.nevada.edu.
